WHY BLANC ESTATES

- 1 CE Class I Medical Device**
Medibios (US Patent 9,662,671 B2) — particles <5um reach every surface without residue or disruption.
- 2 RODAC Microbiological Cultures**
Two-tier verification: ATP bioluminescence (routine) and RODAC contact cultures (clinical areas).
- 3 Amil Care Corp Certificate**
FDA-valid Disinfection Certificate issued by Amil Care Corp USA after each clinical cycle.
- 4 Full Audit Trail**
Pre/post surface readings, photos and protocol log — ready for regulatory inspection.
- 5 35-Year Clinical Background**
Designed by Julio Garcia — 35 years in hospital biosafety, Amil Care Corp representative.

BLANC ESTATES MIAMI

Jackson Memorial Hospital (Miami) — public reference letter by Yvette Riley, Director of Perioperative Services, after 6-month clinical evaluation.

01

Risk Assessment & Baseline

Site survey, area mapping and pre-treatment ATP or RODAC surface hygiene baseline.

02

Medibios CE Class I Treatment

Micro-nebulization cycle: particles <5um cover all surfaces. No residue. No disruption.

03

Post-Cycle RODAC Verification

Microbiological cultures on critical surfaces. Results documented in the protocol dossier.

04

Certification & Dossier

Amil Care Corp USA issues the Disinfection Certificate. Full dossier for compliance files.

Device

Medibios CE Class I — US Patent 9,662,671 B2

Disinfectant

Evolyse Strong CE Class IIa — FDA-listed, broad spectrum

Clinical verification

RODAC microbiological contact cultures

Standard verification

ATP bioluminescence — 3M Clean-Trace Luminometer

Efficacy

>=5-log microbial reduction documented per cycle

Certificate

Amil Care Corp USA — FDA-valid documentation
