

## Restaurant & Hospitality Disinfection

FDA-listed disinfection with ATP verification for kitchens, dining rooms, hotel rooms and common areas.

”  
A health inspection dossier delivered after every cycle — not just a clean-looking kitchen.  
” — Blanc Estates Miami

**FDA-listed**

Disinfectant

**ATP**

Post-cycle

**Zero**

Toxic residue

### WHY BLANC ESTATES

- 1 Kitchen and Dining Safe**  
Evolyse Strong FDA-listed — safe on food-contact surfaces after evaporation. No rinsing needed.
- 2 ATP Verification Every Cycle**  
3M Luminometer before and after each cycle — documented surface hygiene for health inspectors.
- 3 Hotels: Rooms and Common Areas**  
Guest rooms, lobbies, fitness centers, spas — complete coverage with <5um particles.
- 4 No Disruption to Operations**  
Overnight or between service periods. Safe re-entry after full evaporation.
- 5 Health Inspection Ready**  
Surface hygiene dossier available for local health authority inspections at any time.

*Trusted by luxury restaurants and hospitality venues across Miami-Dade and Broward — documented results, health inspection ready.*

- 01 Pre-Shift Baseline Assessment**  
ATP readings on kitchen surfaces, dining areas and high-contact points before treatment.
- 02 Medibios CE Class I Treatment**  
Overnight micro-nebulization — <5um particles reach every surface including HVAC grilles.
- 03 ATP Post-Cycle Verification**  
3M Luminometer on all treated areas. Target: <10 RLU. Fully documented.
- 04 Compliance Dossier**  
Surface hygiene data delivered after each cycle — ready for health authority review.

**Device**  
Medibios CE Class I — FDA-valid micro-nebulizer

**Disinfectant**  
Evolyse Strong CE Class IIa — FDA-listed, food-safe after evaporation

**Verification**  
ATP bioluminescence — 3M Clean-Trace Luminometer

**Target**  
<10 RLU post-cycle on food-contact surfaces

**Re-entry**  
Safe after evaporation — no residue on food surfaces

**Dossier**  
Pre/post data for health authority compliance
